VICTORY ARCHERY VAP VOODOO BOLT

Victory Archery is now offering its VAP VooDoo Crossbow bolt. The revolutionary patent-pending design offers speed, accuracy and killing power. The new bolt design combines Victory Archery's ultra-small-diameter shaft with exclusive Rail Ryder technology that allows this crossbow bolt to be faster and more accurate than traditional bolts. This is due to only having two contact points on the bolt, the nock end, and the center of the shaft. The innovative design is compatible with most crossbow models. For more information, visit www.victoryarchery.com.

GORILLA GLUE EPOXY

Gorilla Epoxy combines high-impact resistance with an uncommonly-strong bond in a 5-minute set formula. A familiar complaint among quick-setting epoxy users is a brittle bond, requiring jobs to be redone. Gorilla Glue has toughened its epoxy formula with urethane hybrid technology that improves overall strength and flexibility. Consumers can be more confident in a permanent fix the first time. Gorilla Epoxy also features structural, gap-filling and drillable formulas for challenging projects and an all-purpose formula that easily bonds steel, wood, aluminum, ceramic and much more. It is resistant to most solvents and non-toxic once cured. Gorilla Epoxy comes

in a reusable syringe that dispenses evenly and has a cap for multiple uses and extended shelf life. To learn more, visit <http://www.gorillatough.com/>.

ECBC HARPOON DAYPACK

This is a day-pack-size backpack that you can beat with a sledgehammer and not damage. The ultimate personal bag for someone who travels with just a carry-on, it measures 18.4 by 12.13 by 5.25 inches and weighs a mere 2.2 pounds. Made with water-resistant, rough-density ballistic nylon, plus protective foam to shield a laptop as large as 17 inches, it fits easily under an airplane seat and still leaves enough foot room. It has two main compartments plus a third zipper compartment on the outside, as well as zippered interior pockets and a small pocket on top for keys, phone or other small items. The Harpoon Daypack is available from www.newegg.com, www.luggagepros.com and others.

BOGS ALL-WEATHER BOOTS

Bogs Boots are made from natural rubber for ultimate durability and are created to withstand any and all climate and weather conditions. They are lightweight, flexible and built with a moisture-wicking lining that instantly disperses moisture away from your foot. They feature great traction and are 100% waterproof, keeping your feet warm and dry through rain, mud, sleet, snow, ice and cold. Bogs are available in a variety of styles, including boots for men, women, kids, farmers, hunters, and casual boot-wearers. To learn more, go to www.bogsfootwear.com.

LAKWOOD PINK BOWFILE CASE

Lakewood Products is continuing to expand its new line of Elite Bowfile bow cases. The new Lady Elite Bowfile is now available in True Timber's XD pink camouflage, in recognition of breast-cancer awareness. The Lady Elite Bowfile case is now easier to carry and handle with an 18 percent reduction in overall weight. The unique drop-in design allows a hunter to open the case and place his or her bow inside, field-ready with a loaded quiver still attached to the bow, so there's no time wasted. The case is made of ABS, so sturdy you can stand on it. The interior is foam-lined to protect your cargo and accessories. The exterior is lined with ballistic nylon for good looks and to protect your SUV's interior. Both Elite and Lady Elite Bowfile cases are airline approved and have exterior D-rings for secured transport and easy carrying (with an included carrying strap). For more information, go to www.lakewoodproducts.com.

G.LOOMIS GLX RODS

G.Loomis' new GLX bass rods include 11 casting models, nine spinning models, and three ShakyHead rods. GLX Jig & Worm casting rods are designed specifically for fishing jigs and soft plastics. They feature a split-grip handle with a "mag touch" trigger reel seat, Fuji Titanium SIC guides and tip-tops. Legendary for their sensitivity, these rods will tell you everything that's going on with that bait. They have extra-fast actions, allowing you to make accurate, low-trajectory casts with plenty of power to handle big bass. ShakyHead rigs are a great approach for getting results in lakes where the fish get a lot of pressure and have seen every type of bait you can imagine. It's a unique style that requires a special rod action to impart a quiver into a finesse worm mounted on a jighead by subtly shaking the rod tip. To learn more, visit www.gloomis.com/.
