

Newly Released Products

Protective Apparel

KLEENGUARD A40 Liquid & Particle Protection Apparel with breathable back has a front made from microporous film laminate material that provides a better liquid barrier than Tyvek®. Its back is made with highly breathable material that releases body heat to keep you cooler and more comfortable while you work.

Ambient Ionization System

The DART® GSX™ System for the Agilent® GC/MSD enables ambient ionization on a GC/MS instrument. Customers with Agilent GC/MS instruments will now be able to add Direct Analysis in Real Time (DART) capability to their labs. The DART GSX System includes a DART G12 source and the GSX™ Interface coupled to the Agilent GC/MSD. QuickStrip™ Sample Cards facilitate routine analyses of up to 12 samples in a single unattended experiment.

Work Boot for Food Industry

The Food Pro waterproof work boot features the Bio Grip outsole that provides a combination of slip- and chemical-resistance. The boot is self-cleaning for additional traction in debris-laden surfaces and features 2mm Neo-Tech for mild insulation and Max-Wick to help minimize moisture. The boot's soft and flexible rubber upper can be rolled down in warm conditions.

Flame Resistant Fabrics

The FlexTex line of flame resistant (FR) fabrics was developed for increased comfort and movability. FlexTex fabrics include an elastomeric fiber that allows fabric to flex up to 14 percent with a 97 percent recovery. FlexTex fabrics have a bilateral flex that allows them to elongate sideways and diagonally, eliminating any sagging or bagging. FlexTex fabrics meet the requirements of ASTM F1506. — Mount Vernon FR, 706/734-4920
