

Gas Detection

NexTeg, distributor for Gastec Corp., has developed an iPad app that gives users mobile access to information from the firm's gas detection site. App provides access to complete technical information for pumps and tubes, sampling accessories, fast response HiCoMat testing, water and soil analysis, respirator fit testing and other gas detection kits. App provides hand-book pages and instruction sheets for all products, as well as performance charts, sample times and concentration scales. www.nexiteq.com

Hand Sanitizer

DeBMed introduces a new dispensing technology called Optidose that delivers the optimal amount of sanitizer required to complete a proper hand sanitization with one dose. Product achieves optimal wet time of 15 to 20 seconds. www.debmed.com

Grounding Clamp

Bond-Rite self-testing static grounding clamp from Newson Gale establishes and continuously verifies safe low-resistance static grounding and bonding in hazardous areas. Tungsten carbide teeth readily contact a metal surface to establish a ground connection, while a pulsing green LED indicator assures user that a low-resistance bond to ground continues to exist. The clamp, which can be used both indoors and out, is supplied complete with a 5-m retractable cable, a ground connection junction

box and a storage point for the clamp. Models are available with alternative cable lengths or self-rewind cable reels. www.newson-gale.com

Office Ergonomics

Tighter budgets, smaller staffs, the growth of non-traditional office spaces, multi-site facilities and other factors affect the ability for SH&E professionals to perform face-to-face office ergonomics assessments. HumanTech's Ergopoint Office Suite lets the administrator deliver tailored ergonomic training and self-assessment online to empower workers with knowledge of proper workstation setup, and lets the SH&E professional easily and efficiently manage the ergonomics process. Interactive training module was designed around HumanTech's Four Points of Contact—users learn proper work habits and

workstation setup based on four key interaction points between the worker and the work. User completes a 30-minute online training, followed by a thorough self-assessment that provides data needed to understand challenges and plan solutions. Program provides detailed management tools, allowing safety staff to monitor issues and track improvements from one or more locations. Data collected allow a firm to prioritize issues and equipment needs, and highlight problematic areas. Ergopoint site lets visitors take a quick tour, view a training sample or sign up for a live demo. www.ergopoint.com

FR Apparel

Bulwark has partnered with Polartec to deliver flame-resistant (FR) work garments, including pullover and zip-front hooded sweatshirts, and jackets. Product line focuses on comfort, moisture management and flame resistance. FR fabrics are designed to work together to create a layering system with less bulk to offer insulation, improved mobility, greater comfort and breathability. www.bulwark.com www.polartec.com

Industrial Footwear

Bogs Footwear's Joumeynar STMG work boot features a steel plate in the outsole, steel toe and metatarsal guard. Reportedly ASTM approved, boot is engineered with chemical- and slip-resistant outsole for traction

and durability. Waterproof, insulated boot is constructed with a durable rubber upper and moisture wicking lining to keep feet dry and comfortable. www.BogsFootwear.com
