

Product Focus

Foot protection

◀ Industrial boot

The 6-inch Industrial Chukka boot offers safety, comfort and durability. With a contoured fit for added protection, the boot provides lightweight functionality with 4-mm Neo-Tech and 2-mm Airmesh lining. Channel Air helps circulate air and adds breathability to keep workers cool and comfortable. It also has an ASTM-approved chemical- and slip-resistant non-marking and self-cleaning outsole.

Work boots ▶

The Work Flex Boot series is available in soft and composite toe. The boots are lightweight and feature a full-grain, oil-tanned leather upper and dual-density rubber outsole. All Work Flex boots meet ASTM standards for electrical hazards and are oil-, chemical- and slip-resistant. They are available in 6- and 8-inch styles, Wellingtons, and waterproof and insulated styles.

◀ Slip-resistant work boot

The Caterpillar Silverton SG work boot features a full-grain leather upper and SuperWelt construction that ensures forefoot flexibility. The boot is made with a SureGrip outsole that channels water, grease and oil away from the tread to provide superior traction. Its steel toe meets ASTM F2413-11 and F2412-11 standards. The Silverton SG has lace-up closures and metal eyelets for durability.

◀ Waterproof boot

The Work Comfort Technology II Waterproof Boot is a lightweight and highly breathable 6-inch lace-up boot. An aluminum alloy toe makes the boot even more lightweight while providing ASTM F24013-11 standard impact resistance. A removable, antibacterial Airflow insert is breathable from head to toe. For added comfort, the Poron XRD Reactive Defense insert absorbs 90 percent of strike impact.
