## Bogs Boot Review

6 May 2013 By [Melissa Farage](#)

If you're looking for an everyday light utility boot, look no further than Bogs. Bogs transforms the old and overdone rain boot, taking the Seattle staple to a new level. For those who are tired of the stiff and standard rubber rain boots, Bogs offers an innovational alternative waterproof boot made completely from treated nylon fabric, insulated to provide warmth in chilly conditions. Winter backpackers can enjoy the compact convenience of these insulated boots, while those looking for a cute fashion statement will be delighted by the boots' chic silhouette.
